

# INQ LOVES SOCIAL MUSIC!

"The buzz surrounding Spotify is totally justified. Our main owner, Mr Li K-Shing, who is Chairman of INQ's Parent Company, Hutchison Whampoa Limited, invested in Spotify in 2009 because it was a brilliant, disruptive consumer experience that has core technology that is very hard to replicate, and I have been proud to be a board member since that time. We share a similar vision to Spotify, in that we're pioneering the way music is shared, and with Spotify as the default music player on INQ devices we are making the users' music experience more social, richer and better."

**Frank Meehan, Founder and CEO, INQ Mobile**
